

Data Current as of:
04-Nov-16

Sediment Quality Verification Dataset - Summary

North Saskatchewan River Release

Note: Sediment samples were initially sent to SRC for analysis but are now being sent to ALS.

SRC is not accredited for PAH analysis in sediments and has higher detection limits for PAHs than ALS

Many of the PAH compounds detected in samples sent to ALS are below the SRC detection limits

The higher sensitivity of ALS analyses results in more PAH detections than SRC

A table comparing detection limits is given below the data

Sample Date	Sample Time	Location	Sample Type	ID	Lab	Substance	Result	Unit	CCME ISQG Exceedance ¹	CCME PEL Exceedance ²
