

Instructions to Complete Application for Development Permit under *The Water Security Agency Regulations*

Please read these Instructions completely before filling out the accompanying Application form.

Pursuant to Section 4 of the *The Water Security Agency Regulations*, no person shall undertake any development within a reservoir development area without a permit. Every applicant for a permit shall submit to the Water Security Agency (WSA) a completed application form, an acceptable plan of the proposed development and any additional information as the WSA deems necessary to evaluate the potential for impacts to, or from, the development. A separate and complete application is required for each development and the following provides itemized information on how to complete the application form.

Item 1: *Name of Applicant(s)*

The applicants should be the owners or legal occupants of the property on which the development is proposed. If the applicants do not own the property, a legal interest is required. The applicants are to clearly print or type their surnames and at least one given name and initial(s). When lands are owned by a corporation, company, association, or other legal entity, the full name of the entity is to be shown as the applicant. Additionally, and in order to address correspondence and inquiries, the first and last name of a principal contact should be provided.

Where the applicant is not the owner of the affected lands, signature of both the applicant and the land owner must be provided.

Item 2: *Reservoir Development Area*

Identify the specific reservoir development area in which the proposed development will be located.

Item 3: *Type of Development*

Check all of the development types that apply to your project.

Item 4: *Description of Works*

The applicant is to provide a brief description of what the development will consist of. Include a description of any intended operations or activities associated with the development.

Item 5: *Description and Owner of Lands*

The full legal description (Quarter Section, Township, Range and Meridian or surface parcel number as shown in the Saskatchewan land registry) and the names of the owners or occupants are to be provided for lands on which the development will be located and/or will be affected by the development. The applicant's legal interest in each parcel of land affected should be shown as one of the following:
a) registered owner, b) holds the land under agreement for sale, or c) leases the land.

Item 6: *Development Schedule*

General development timelines are to be provided. Where a detailed schedule of development exists, it should be appended to the application.

Item 7: *Development Plans*

Detailed plans of the development should be provided with this application. If plans are being prepared by a third party, that party should be identified along with an estimated date for plan submission.

Item 8: *Engineering, Geotechnical or Architectural Assistance*

Developments situated in a reservoir development area are within a geographic area in which a development, by itself or with others, may affect the reservoir or adjacent properties. Accordingly, professional or technical assistance is most often needed to properly and adequately plan, design, construct or operate a proposed development. The applicant is to provide a brief description of what investigations and evaluations will or have been done to ensure the proposed development proceeds in a safe and proper manner.

Item 9: *Municipal Approval*

The WSA requires approval in principle of the proposed development from the municipality within which the development is located. This approval may be in the form of demonstrated compliance with existing zoning requirements and bylaws or by the approval of council in a form of its choosing.

Applicant's Signature: All applicants and the legal owner of the affected lands are required to sign and date the application (*See Item 1*). When lands are owned by a corporation, company, association, or other legal entity, the application must be signed by an officer or director and a seal affixed. If no seal is affixed this application must be accompanied by an affidavit of corporate signing authority.

Completed applications should be submitted to:

Water Security Agency - Head Office
Victoria Place
400 - 111 Fairford Street East
MOOSE JAW SK S6H 7X9
